## DERMASTIR TSUNAMI - DEEP CLEANSER

Dermastir Tsunami is an airless deep cleanser with gentle exfoliation that can be used on all skin types. The deep cleansing action is automated and oxygen bubbles are formed to disinfect the skin surface. Dermastir Tsunami is also one of the most frequently used skin eruption treatments in cases such as dermatitis, rosacea, impetigo, psoriasis, eczema, rash, comedones etc. Dermastir Tsunami is so effective that it is also indicated in cases of mild to moderate acne.

Presented in an airless dispensing system to ensure maximum protection against oxidation and bacteria.

Effective deep cleansing that is gentle on the skin since ingredients do not become abrasive because of oxygenation.

It can be used long term even for prevention since P. Acnes resistance is not developed.

Made in France using safe, high stability and high quality ingredients.

Most skin eruption treatments leave the skin dry unlike the Dermastir Tsunami.

**Peroxide Free**  
**Parabens Free**  
**Oil Free**

**AIRLESS TECHNOLOGY  
OXYGENATION**

**NON STEROIDAL  
ANTI-INFLAMMATORY**

**KERATOLYTIC  
PORE OPENER**

**WATER-BASED  
HYDRATION**

**ANTIOXIDANT  
ACTION**

Propionibacterium acnes, or P. acnes, are the bacteria responsible for acne breakouts. They cannot live in an aerobic (oxygen-rich) environment. Dermastir Tsunami uses airless technology that works by introducing oxygen into the pore, thereby killing the anaerobic P. acnes. When the bacteria population is reduced, the number of breakouts on the skin is also reduced. Dermastir Tsunami prevents Propionibacterium acnes from replicating by preventing it from making vital proteins. Dermastir Tsunami also kills P. acnes directly, but since it is an oxidizer, not an antibiotic, it is not subject to P. acnes resistance like in the cases of erythromycin and clindamycin.

## ACTIVE FORMULA

**OXYGEN BUBBLE TECHNOLOGY**  
Active against anaerobic bacteria

**KETOROLAC TROMETHAMINE**  
Non steroidal anti-inflammatory - Anti redness

**SODIUM HYALURONATE**  
Hydration

**CHLORPHENESIN**  
Bacteriostatic properties

**VITAMIN E**  
Antioxidant - protects the skin from free radicals

**ACRYLATE COPOLYMER**  
Exfoliating properties

### DIRECTIONS FOR USE

Start by evenly spreading the gel over the face and neck in a thin layer. Leave the gel to act and oxygenate the skin for up to 15-20 minutes. Massage gently, rinse off and feel the exfoliating effect.

Once the skin eruption has subsided, continued use of Dermastir Tsunami deep cleanser is recommended to help prevent future problems.
