DERMASTIR DROPPER

REDNESS NEUTRALIZER

30ml

A Redness Neutralizer serum ideal for sensitive or problematic skin conditions. This light oil-free serum contains ingredients with anti-inflammatory and antiseptic properties to help calm irritated skin. The serum helps to prepare the skin for rejuvenating procedures and reduces post-treatment redness. In post-op the serum soothes, neutralizes redness and helps to minimize all types of conditions causing redness.

REPAIR CORRECTOR

30ml

The serum is enriched with ingredients, known to promote tissue repair. The Dermastir Repair Corrector serum replenishes ingredients the skin needs to feel supple and smooth. This moisture-enhancing serum contains hyaluronic acid, to bind moisture to the skin. Dermastir repair corrector serum is recommended for use in post-op and post treatments. This serum maximizes the benefits of a daily moisturizer and is ideal for all skin types.

ANTI-OXIDANT SERUM

30ml

This broad-spectrum anti-oxidant treatment provides advanced environmental protection to defend skin against free radicals, that are known to cause cellular damage, and against UVA and UVB radiation. In addition to its superior antioxidant capabilities, the serum has been proven to correct existing damage from the inside out. Collagen synthesis is stimulated to decrease signs of aging.

HYDROPHILIC SERUMS

RICH NUTRITION

30ml

Dermastir Rich Nutrition prevents the glycation process and corrects severe signs of aging in mature skin. Bioflavonoids slow down the process of advanced glycation end-product formation, preventing collagen and elastin fibers from becoming rigid. GAG synthesis is stimulated prompting the skin to re-inflate from within, restoring water and nutrients to the dermal-epidermal junction. The skin barrier is reinforced by promoting synthesis of lipids.

RESURFACING POST-OP

30ml

The Dermastir Resurfacing serum normalizes epidermal renewal to create a noticeably smoother, softer surface texture. The ingredients stimulate enzymes that help break the bonds that bind dead cells to the surface of the skin, to dramatically diminish surface lines and wrinkles. Dermastir resurfacing serum speeds skin-cell turnover to improve skin radiance, keeping new, healthy skin on the surface.

WHITENING SERUM

30ml

Dermastir Whitening serum has been tested to be as effective as the leading medical standard for treating hyper pigmentation. The ingredients reduce existing hyper pigmentation, improve overall skin tone, and protect skin from future discoloration without the potentially harmful side-effects of harsh bleaching agents. The whitening serum is effective on brown spots, freckles, dark patches, and pigmentation.

DERMASTIR AUTO DROPPER
