DERMASTIR MOISTURIZING

Skincare ampoule with moisturizing ingredients that protect the skin by reducing dehydration. The cornflower extract and the linden extract in a moisturizing base are recommended by Alta Care Laboratoires for dehydrated skin conditions.

Dermastrir Moisturizing ampoules have superior hydrating properties than gels and creams because the ingredients in the serum are stored in a monodose glass ampoule. Dermastrir Moisturizing ampoules are used often in combination with aftersun creams to give added hydration to the skin following sunbathing.

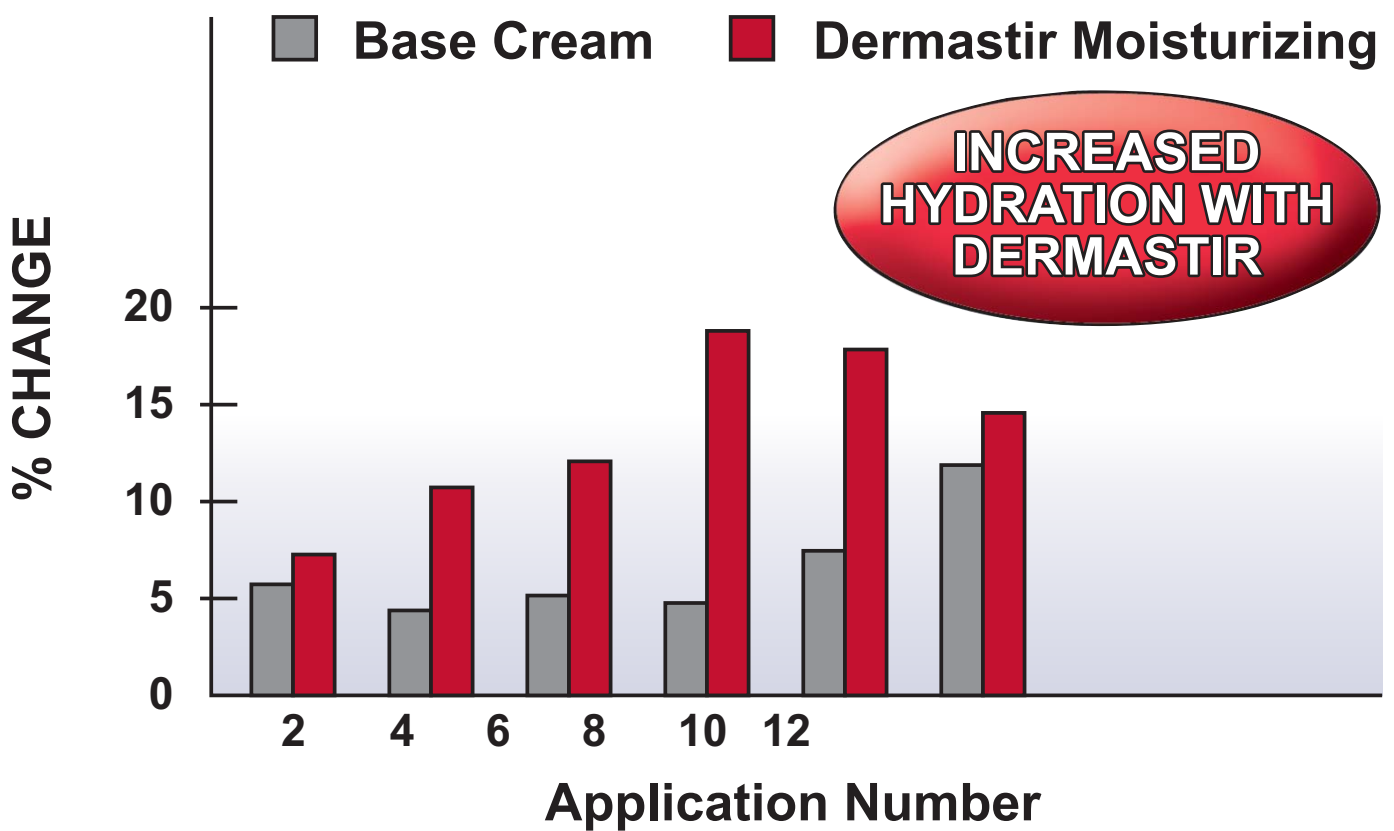

CORNFLOWER EXTRACT / CENTAUREA CYANUS

Cornflower is known for its soothing qualities, and it is therefore especially beneficial for sensitive skin and eye care products. The tannins in the extract provide stimulating and refreshing properties, while other components offer powerful moisturizing effects.

LINDEN EXTRACT / TILIA CORDATA

The extract from the flowers of the lime tree, contains an essential oil similar to aloe and chamomile, an emollient and soothing agent for the skin. Linden's aroma has a beautiful sweet, light floral smell. The major active constituents in linden are flavonoids and glycosides. Its major active constituents have hydrating properties. Flavonoids are potent antioxidants and glycosides are monosaccharides that have water-binding properties.
