DERMASTIR LUXURY ZINC MASK

Dermastir Caviar Zinc Mask produced by Alta Care Laboratoires is occlusive when applied to the epidermis. This helps the active ingredients to penetrate deep into the skin because of the increase in microcirculation. The caviar and the soothing elements enrich this formulation. Dermastir Caviar Zinc Mask is used to repair intensively all the layers of the skin. The repairing action of the mask is more intense than the repairing action of the night cream.

Dermastir mask is indicated to purify the skin when there are skin eruptions or signs of redness. In a few minutes the skin regains its purity and brightness, fatigue and stress symptoms disappear from your face and the epidermis looks cleaner, younger and fresher.

Dermastir Caviar Zinc Mask is presented in an airless 50ml jar with vacuum flask technology to guarantee that the ingredients remain intact.

The ingredients in the Dermastir Luxury Zinc Mask are constantly kept in an airless packaging to prevent oxidation and contamination by contact with the air and environmental pollutants. This guarantees good efficacy of the product from the first application to the last.

DIRECTIONS FOR USE

1 or 2 times a week, apply a uniform layer to a perfectly cleansed face and neck, avoiding periorcular areas. Leave on for 10 minutes, then rinse off thoroughly with lukewarm water.

ZINC BENEFITS

- **PORE ASTRINGENT**
- **ANTI-INFLAMMATORY**
- **REDUCES SKIN IRRITATION**
- **REPAIRS DAMAGED TISSUES**
