

DERMASTIR®

Dermastir Day Cream SPF 30+ is an intensive nourishing caviar cream with sun protection factor that prevents the formation of wrinkles. Caviar is a very luxurious anti-aging ingredient which oxidizes very easily and therefore it is best presented in Dermastir airless packaging. This cream is suitable for all types of skin and for all ages, it has a protective action with ingredients that restore a healthy level of hydration. Dermastir Day Cream SPF 30+ contains an innovative complex studied and produced by Alta Care Laboratoires which includes caviar, precious phytoextracts, vitamins, anti-oxidants and amino acids with a regenerating action.

Dermastir Day Cream is available in a white or a tinted version.

CAVIAR EXTRACT PROPERTIES

Extracting oil from one of the world's most expensive delicacies and incorporating it into skin cream gives life back to the skin cells because of the cellular consistency between skin and caviar. The cellular structure of caviar is strikingly similar to that of the skin: 50 to 70 percent water, with a similar percentage breakdown of lipids, protein

and trace elements. It is very rich in vitamins A, D, B1, B2, B6 and micro-elements Co, Cu, P, Si, Zn as well as amino acids like glycine, lysine, histidine, arginine, asparagine. These ingredients intensify the processes inside the skin cells and at the same time slow down the aging process by moisturizing.
